LAWN GRASS SEEDS

Making a lawn is a job that most of us only have to undertake once or twice in a life-time. We build lawns for permanence, and for that reason we

SHOULD go about it with the utmost care. The soil should be carefully prepared before planting the seeds.

It requires about 10 pounds of Blue Grass seed to 1,000 square feet (Bent seed about 5 pounds). Fertilize with a good commercial fertilizer such as Vigoro, Milorganite, Loma or Ivy, using 100 pounds to 2,500 square feet and cover with Peat Moss. (1 bale covers about 800 square feet.)

We are always pleased to help you with your lawn problems.

These prices are **NOT PREPAID**. If wanted by mail, include postage at the regular zone rates. **NO SALES TAX ON SEEDS.**

The SIMPSON SEED CO., warrants to the extent of the purchase price that seeds, plants or bulbs sold are described on the container within recognized tolerances. Seller gives no other or further warranty, express or implied.

As soon as the ground is in good condition, transplant outside in rows 2 feet apart and 15 to 18 inches in a row. The soil should be mellow, rich and well drained. Water Keeps Your Plants Alive

Remember—plants that go thirsty also go hungry—even the richest soil cannot supply food without water to dissolve the food elements. And because plants literally eat with their small hair roots you must put their water supply deep into the soil for proper feeding.

Attached to your garden hose the IRI-GATOR puts the water where it does the most good—at the plant roots. Three times as fast as the conventional cloth soaker or usual sprinkler—water flows freely but gently through the IRI-GATOR. Little or no soil washing and with no wet foliage to invite disease.

KITTY LITER. Kitty litter is a specially processed material which provides a new and better solution to a problem confronted by owners of cats. It does away with the daily, unpleasant "messy sand box routine". Unlike sand, it dries and deodorizes. You will find it much more economical to use than sand; it need not be changed every day, so you will find it substantially lower in cost. We suggest a Kitty box or pan 15 or 16 inches in diameter. At the end of every other day you will see that the droppings have dried so thoroughly that they can be removed with a Kitty Litter Scoop and disposed of easily. 5 lbs. 70c; 10 lbs. \$1.30; 25 lbs. \$3.00; 50 lbs. \$5.50.
